

## **ENVIRONMENTAL POLICY STATEMENT**

The main aim of Ecogen Recycling Ltd is to provide economic recycling and waste disposal services aimed at minimising the impact on the environment.

We recognise our responsibility to manage the environmental impacts of our services. We have assessed our activities and identified that our significant environmental aspects include the storage, processing and handling of recyclables; the transportation thereof and the risk of pollution from materials stored at our site. In order to promote good environmental practices, our Policy with regard to the environment is as follows: -

1. To maximise the amount of waste we recycle, above a minimum level of 98%.
2. To develop suitable objectives, targets and management programmes, applying appropriate operational procedures to minimise our significant environmental impacts during normal, abnormal and emergency conditions.
3. To comply with relevant legislation, regulation and other requirements relating to our significant environmental impacts.
4. To prevent pollution, minimise our inputs of utilities and resources, and the outputs of emissions to the atmosphere, effluents to waters/sewers and wastes to disposal facilities.
5. To provide appropriate environmental training where needed.
6. To ensure that suppliers and contractors understand the Company Policy and to assist them in developing appropriate systems and a responsible approach with regard to environmental issues.
7. To communicate and co-operate with, and respond to the views of interested parties, including government agencies, customers and the general public, on environmental issues where this is practicable and likely to result in an overall improved environmental performance.
8. To strive for continual improvement in overall environmental performance.
